

Casio Education Online Resources

- 1) **PRIZM “Getting Started” Webinar:** Whether you will be using the handheld unit or the software, this webinar is a great introduction to the calculator basics. Feel free to view this as often as you would like, and at your own pace!

- 2) **PRIZM Online Training:** The CASIO Prizm Online Training is a great way to introduce teachers to the full spectrum of functionality that CASIO graphing technology has to offer. This course is suitable for first-time users, as well as those with more familiarity, who have a few questions about a particular application or functionality. While there are three assessments, they are not mandatory and users can take as much or as little of this course as they like. It is very flexible, completely self-paced and free to take!

- 6) **CASIO Picture Conversion Engine:** To take your own images and load them on the Manager Software, you need to use the Picture Conversion Engine. The files located on the software and handheld units are all proprietary and protected calculator files, to ensure test security. Once a file is converted, it can be used in class with the Manager Software. Check out how easy it is to create your own lessons with the Conversion Engine!
